ALSYS

PROCESS Services

Commissioning and start-up technical assistance

Knowledge and experience

- Technical assistance for the commissioning of the installation
- Training of workforce for module assembly and leakage test
- A team of start-up engineers and after-sales technicians
- Upgrading of existing systems (revamping)

MATERIALS Services

Membrane replacement and after-sales services

Knowledge and experience

- Membrane replacement, spare parts and maintenance
- Module and membrane integrity testing
- Troubleshooting

Audit, on-site technical assistance and staff training

Objectives

- ✓ Technical inspection on site
- ✓ Diagnosis of the filtration process

Analysis and autopsy of used membranes

Objectives

- ✓ Analysis of the membranes after use. Tools: SEM microscope, chemical analysis, ...
- ✓ Characterization of the damage (chemical, mechanical)
- ✓ Identification of improvement (cleaning process, ...)

Upgrade of existing systems (revamping, optimization)

Objectives

- ✓ Rehabilitation or revamping of a failing system (addition of a drain, modification of the pumping station, ...)
- ✓ Optimization of an existing system (CIP modification, addition of instruments, ...)
